VAPOR BARRIER SERVICES

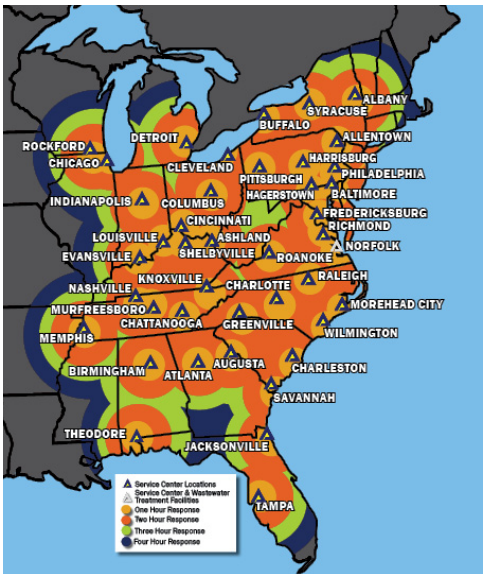
ABOUT HEPACO

Founded in 1984, **HEPACO, LLC** (HEPACO) is a professional environmental services company with strategically-located service centers providing coverage throughout the Eastern United States, and beyond.

VAPOR BARRIER SERVICES OVERVIEW

Impermeable membranes are an ideal use on brownfields and other contaminated sites as an engineering control for pollution containment. As a certified installer of various types of gas and vapor barrier systems, HEPACO can provide installation and design assistance to complete these complex projects.

HEPACO installs a variety of seamless cold spray applied, water-based, and VOC-free membranes and venting systems which provide a barrier against vapor intrusion into structures on brownfields or other environmentally impaired sites. HEPACO also installs various 2-part odorless, VOC-free vapor intrusion coating systems that consist of chemically resistant materials to protect existing floor slabs and structures from the threat of contaminant vapor intrusion.



SAFETY IS AT THE HEART OF OUR CORE VALUES

HEPACO has a deeply-ingrained safety program that is embraced across every level of our organization. We maintain an **Experience Modification Rating** (EMR) of **0.81**. All HEPACO field personnel receive extensive training and are part of a medical monitoring program. In addition to HAZWOPER, RCRA, DOT, confined space entry/rescue and first aid/CPR training, we maintain a wide variety of certifications, including **SafeLand**, **Pipeline Operator Qualified** (OQ), **Loss Prevention Systems** (LPS), **API Tank Entry Supervisor** (TES), and **API WorkSafe**. HEPACO is pre-qualified by the contractor screening consortiums ISNetworld, CCS, PEC Premier and Avetta. We are also a permitted hazardous waste transporter and a U.S. Coast Guard classified **Oil Spill Response Organization** (OSRO #32).

WHAT ARE VAPOR BARRIERS?

Gas vapor membrane technology is designed to eliminate vapor intrusion into structures built on contaminated sites, including brownfields, former landfills, manufacturing facilities, former dry cleaners, and gas station properties.

HEPACO offers tailored engineering control solutions for contaminated sites. Vapor barrier products are applied directly to penetrations, grade beams, footings, pile caps, and other structures to provide a fully-adhered gas vapor barrier system.

In addition to providing design assistance during project planning, HEPACO supplies and installs various types of gas and vapor barrier systems to support site remediation efforts and achieve cleanup goals.
